

DatAnswers

Privacy-centric search for DSARs, right to be forgotten, and e-discovery

Challenge

Finding sensitive information for satisfying privacy regulations or e-discovery can be a time-intensive process, especially when you have data across multiple on-prem and cloud data stores. Search capabilities without logic on the backend often produce mountains of false positives, making it difficult to fulfill data subject access requests (DSARs) within the allowed timeframe.

Solution

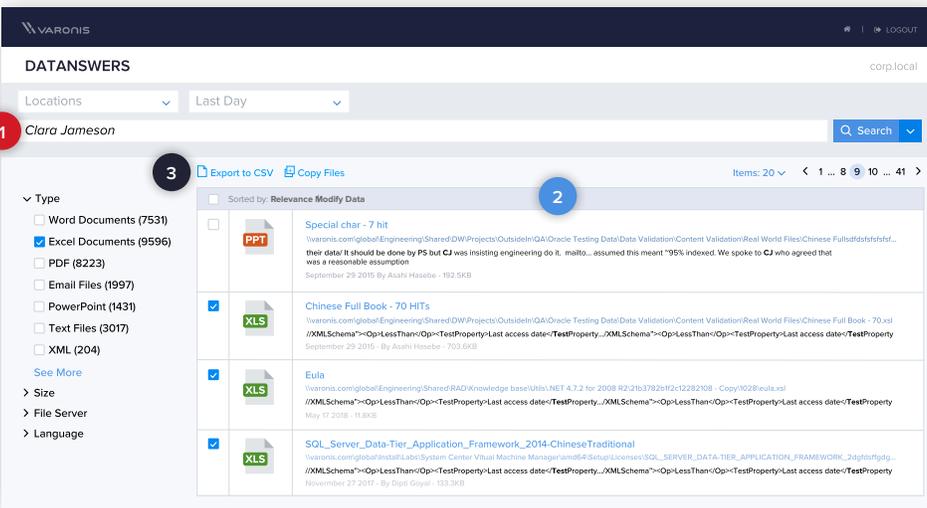

Varonis DatAnswers is a fast and powerful search engine that can help you find PII across cloud and on-prem files in record time. Satisfying DSARs or complying with e-discovery has never been easier. Behind the intuitive interface is sophisticated, built-in logic that ensures you get high-fidelity results with every search. Search results across all kinds of data stores can be easily filtered, exported, or copied to share with legal/compliance.

Customer Success

“I’ve used Varonis for years in both the financial and legal fields. **From a data privacy regulations standpoint Varonis is a must have tool for achieving compliance.**”

Gartner Peer Insights Review from a Director of Information Security

[READ THE REVIEW >](#)

The screenshot shows the Varonis DatAnswers interface. At the top, there's a search bar with the user name 'Clara Jameson' and a search button. Below the search bar, there are filters for file types: Word Documents (7531), Excel Documents (9596), PDF (8223), Email Files (1997), PowerPoint (1431), Text Files (3017), and XML (204). The search results are sorted by Relevance and show 20 items. The first result is a PPT file titled 'Special char - 7 hit'. The second result is an XLS file titled 'Chinese Full Book - 70 Hits'. The third result is an XLS file titled 'Eula'. The fourth result is an XLS file titled 'SQL_Server_Data-Tier_Application_Framework_2014-ChineseTraditional'.

1

Our DSAR form uses sophisticated logic on the backend to ensure you get high-fidelity results

2

Built-in logic flags files with personal identifiers, and filters allow you to easily refine results

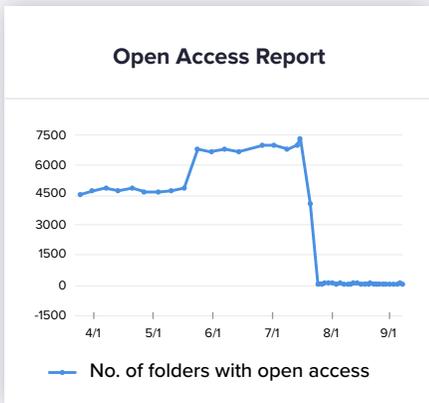

3

Personal information can easily be copied, exported, or deleted to satisfy DSARs

Don't just find PII, **protect it.**

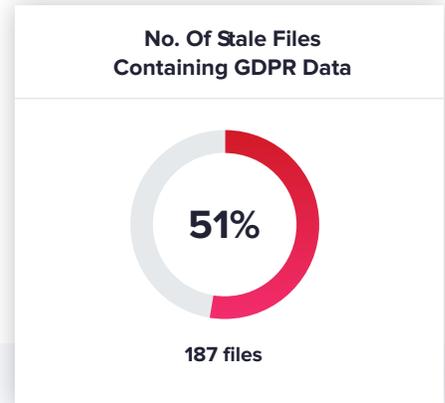

Visualize exposed personal information

Easily see where you have overexposed PII with dynamic dashboards that highlight privacy issues.

Rapidly reduce your attack surface

Reduce the risk of breaches and fines by monitoring for unauthorized access to sensitive information and restricting access to least privilege.

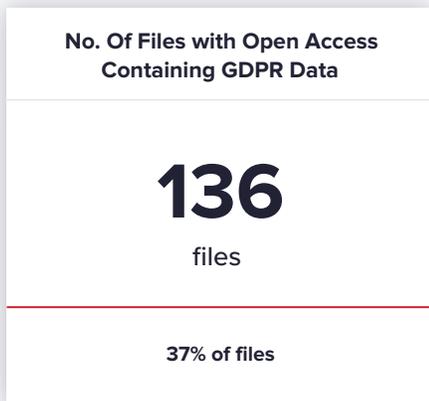

Automate entitlement reviews

Keep risk low over time by designating data owners who can ensure only the right people have access to their data.

Entitlement Review Details

Status	Users
✘	Aimee Blake (corp.local)
	Allen Carey (corp.local)
	Allison Schafer (corp.local)
	Andy Scott (corp.local)

Easily enforce data privacy policies

Set up workflows to automatically enforce retention policies or quarantine sensitive files that show up in insecure locations.

Try DatAnswers For Free

All Varonis products are free to try and come with an engineer-led risk assessment. The easiest way to get started is with a short 1:1 demo and discovery conversation.
