VARONIS

DatAdvantage Cloud

Say hello to the new standard in cloud security

Challenge

As companies boost their reliance on cloud services, securing sensitive data against cyberattacks and accidental overexposure becomes exponentially more complex. Each siloed cloud service has its own data types, permissions models, and activity log formats. The lack of unified visibility and control over data within SaaS and IaaS services leaves companies vulnerable to devastating breaches.

Solution

DatAdvantage Cloud correlates cross-cloud identities with privileges and activities across AWS, Google Drive, Box, Salesforce, Zoom, Okta, GitHub, Slack, and Jira. As a result, organizations can finally see and **prioritize their biggest cloud risks,** proactively **reduce their blast radius,** and conduct **faster cross-cloud investigations.**

Customer Success

"Being able to right size access and detect misuse in the **same platform** makes the security process easy to manage and provides protection when incidents occur."

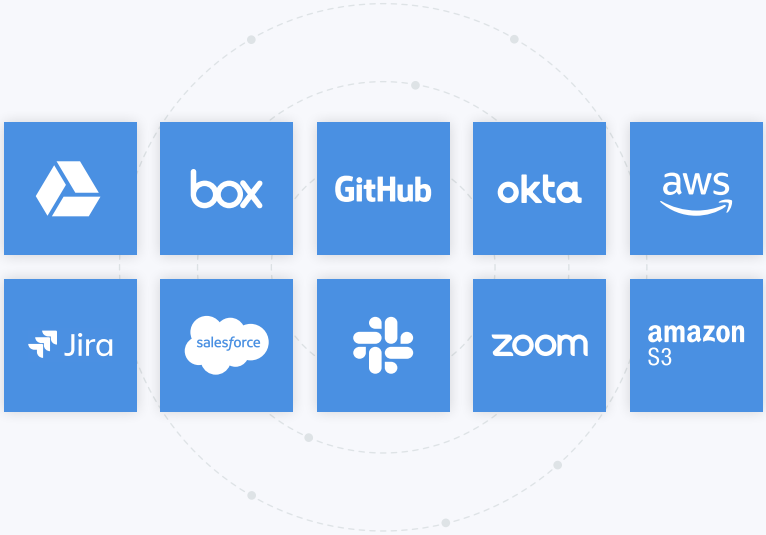
Get deep SaaS & IaaS coverage



Cloud Risk Insights

43% of cloud users
are abandoned, sitting ducks for attackers

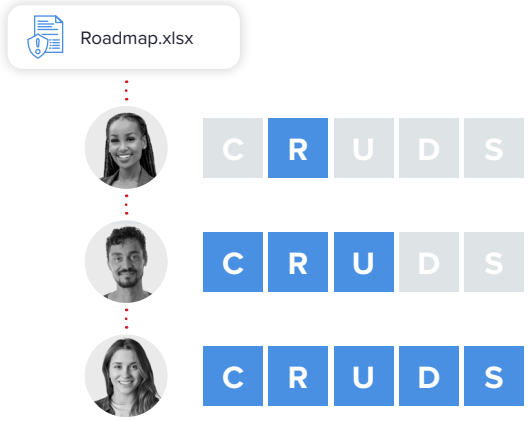
20% of cloud users
can access sensitive corporate data

15% of employees
move business data to personal cloud accounts

Reduce your blast radius

DatAdvantage Cloud maps and normalizes permissions into to a simple create, read, update, delete, and share model (CRUDS) so you can proactively reduce your blast radius. Answer critical questions in a heartbeat:

- Who has access to our sensitive product roadmap?
- How are they getting access?
- What are they doing with it?



Actor	Service	Type
	Jira	Authentication
	aws	Access
	okta	User Management

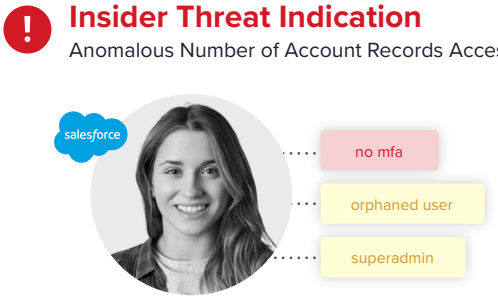
Conduct fast cross-cloud investigations

We standardize and enrich cloud events from all your cloud services, giving you simple answers to complex questions:

- Which external users have granted permissions in any SaaS app?
- Are any admins logging in without MFA?
- What config changes have watchlist users made across all our apps?

Alert on suspicious activity and policy violations

Prevent cloud account takeovers, insider threats, and inadvertent policy violations with cross-cloud auditing and alerting. Use out-of-the-box alerts or create your own.



Try Varonis for free

All Varonis products are free to try and come with an engineer-led risk assessment
The easiest way to get started is with a short 1:1 demo and discovery conversation.
