VARONIS

DatAlert Optimization

Proactively strengthen your security posture to better respond to evolving security threats.

The Varonis Incident Response (IR) team is a group of in-house cybersecurity analysts with extensive experience in threat detection and response. **Request a private session** with us and leverage the team's industry and product expertise to maximize your DatAlert use and enhance proactive threat detection efforts.

- Offered at no cost to DatAlert customers.
- Expert-led by our security professionals with domain and industry expertise.
- Focused on increasing the ROI of security investments across the ecosystem.

How it works

The DatAlert Optimization process will take you through a proven methodology to leverage Varonis even more effectively. Work with our security experts to:

- Establish the proper alert response workflows for your organization.
- Optimize DatAlert for your environment and create custom alerts.
- Enable automated response to stop ransomware in its tracks.
- Prepare and educate your team on how to handle advanced incidents.

★★★★★

Customers rate Varonis **4.9/5 stars** on **Gartner Peer Insights.**

"Varonis' customer service is unbelievable. I've never experienced support this good from any other vendor. They have a strong desire to help you use the product to the best of its ability in a way that meets all of your requirements."

VARONIS

What you can expect

Create a resilient security infrastructure.

- Customize threat models to your specific environment, data, and mission.
- Configure your preferred way to receive alerts (email, syslog, SIEM).
- Integrate Varonis alerts into your security ecosystem with operational processes and systems integration (ex: SIEM, SOAR, etc.).

Receive expert help with investigations.

- Configure automated responses via custom scripts.
- Train the security team to perform context-driven investigations, hunt for threats, and build custom alerts.
- Receive recommendations to improve future detection and response.

Stay ahead of evolving threats.

- Enable Varonis Live Updates to receive automated updates to threat models as they emerge.
- Opt in to the online monitoring system (OMS) to facilitate better product support and incident response help.
- Establish a regular meeting cadence with the IR team to optimize current processes.
