Meet the world-class incident response team.

From thwarting ransomware to catching rogue insiders, our team is here to help identify, investigate, and stop attacks.

To request help from the incident response team, contact your Varonis account rep or fill out **this form.**

Our team will help you with:

Investigating potential incidents

Containment, eradication, and recovery

Deep forensics analysis

Advice on detections, procedures, and cyber resilience

"The biggest thing for us is having the incident response team available and working with us on the security alert side of things. Honestly, Varonis is well worth the money just for incident response."

Network Manager,
U.S. County

# ATTACK SIMS
PRESENTED BY VARONIS THREAT LABS

Watch our newest live attack series.

Join our security analysts for an online series that walks through breaches in real time, demonstrating the most popular tactics attackers use. Learn their entry, bypass, and obfuscation methods, and then watch as we walk you through the steps you can take to respond to these threats.

**Sign up for the next session**

Varonis Threat Labs

With decades of military, intelligence, and enterprise experience, the Varonis Threat Labs team proactively looks for vulnerabilities in the applications our customers use to find and close gaps before attackers can. All learnings are programmed into our platform to help you stay ahead of cyberattacks.
