

Varonis Support Principles

Throughout the Support Services term (the period for which applicable Support Services fees have been paid), Varonis Systems (“Varonis”) provides standard support services to customers using our North America and EMEA support centers during our standard operation hours. Our support offers and standard operating goals are outlined below.

Support Services Goal:

Varonis Technical Support is intended to make our customers’ use of our software products (the “Software”) successful by assisting with troubleshooting and helping to resolve specific issues resulting from the use of Varonis products on supported platforms. Customers may be required to perform reasonable troubleshooting tasks as recommended by Varonis’ support staff.

Support Offerings:

During the Support Services term, Standard Support includes:

- Product updates and upgrades (if and when available)
- Web based, Email and phone support for installation and general use questions
- Access to Varonis’ Support Portal, Knowledgebase and Customer Community
 - Create, update and manage your support cases online
 - Unlimited Knowledge Base access
 - Unlimited access to technical documents
- Use of Varonis’ dedicated toll-free number (<https://www.varonis.com/services/support>)
- Two named contacts

Response Times: Response times are dependent upon the level of Support Services the customer has purchased and the severity of the case. Varonis’ ability to provide support will depend, in some cases, on the ability of the customer to provide accurate and detailed information and to aid in handling a support request or error report.

Relief Goals: Relief Goals describe the target time period for Varonis to provide a temporary resolution of an issue. Varonis reserves the right to request a customer to download an Update (as defined below) or to upgrade to the Current Version (as defined below) in order to resolve a known problem or a technical issue.

Escalation Procedures:

Varonis’ escalation procedures raise the visibility of your most important issues internally. Varonis may, at its discretion, pass any issue into the escalation process. Our normal escalation process includes evaluating the severity level of the issue. Our goal is to solve issues in a timely manner taking into consideration the severity of the issue.

In general, if you are not satisfied with a response from the Technical Support staff, you may request that the issue be escalated to a Support Team Lead or to the Director of Technical Support. Once an issue has been escalated, Varonis Technical Support will coordinate internal and customer resources in gathering relevant data required to identify and solve the issue. Varonis expects our customers to provide adequate resources and the requested data to assist in resolution of the issue.
