T.D. Williamson Taps Varonis to Reduce Security Risks, Streamline Permissions, and Maintain a Least-Privilege Model

The Customer

Location: Tulsa, Oklahoma

Industry: Energy

Products: DatAdvantage, DatAlert and DataPrivilege

"Varonis helps us practice due diligence by providing the information we need to ensure we can make accurate permissions decisions, know immediately if sensitive information has been accessed, and, importantly, apply the principle of least privilege to file access in our global file shares."

- Greg Meador, IT Security Manager

T.D. Williamson, Inc. is a global pipeline equipment and services company based in Tulsa, Oklahoma, with more than 60 locations across 30 countries.

The 98-year-old company relies on the Varonis Data Security Platform to help secure and manage nearly 90 million files globally. From controlling access to sensitive data with DatAdvantage, to receiving notifications on suspicious activity with DatAlert, to managing permissions requests and maintaining a least-privilege model with DataPrivilege, T.D. Williamson leverages the Varonis platform to better protect its global data stores.

"Varonis helps us practice due diligence by providing the information we need to ensure we can make accurate permissions decisions, know immediately if sensitive information has been accessed, and, importantly, apply the principle of least privilege to file access in our global file shares," said Greg Meador, IT Security Manager at T.D. Williamson.

The company realized a variety of benefits from the Varonis platform. In addition to streamlining permissions, reducing workloads, and identifying and archiving stale data, T.D. Williamson improved the experience for its employees worldwide.

"Varonis is a powerful solution that provides a single portal to reference file access information," said Meador. "Our users are happy with the shorter lead times in fulfilling their requests to get access to data. Varonis not only helps create a more secure environment, but it is also easy to use and very customer friendly."
