

## BOX SECURITY EVENTS

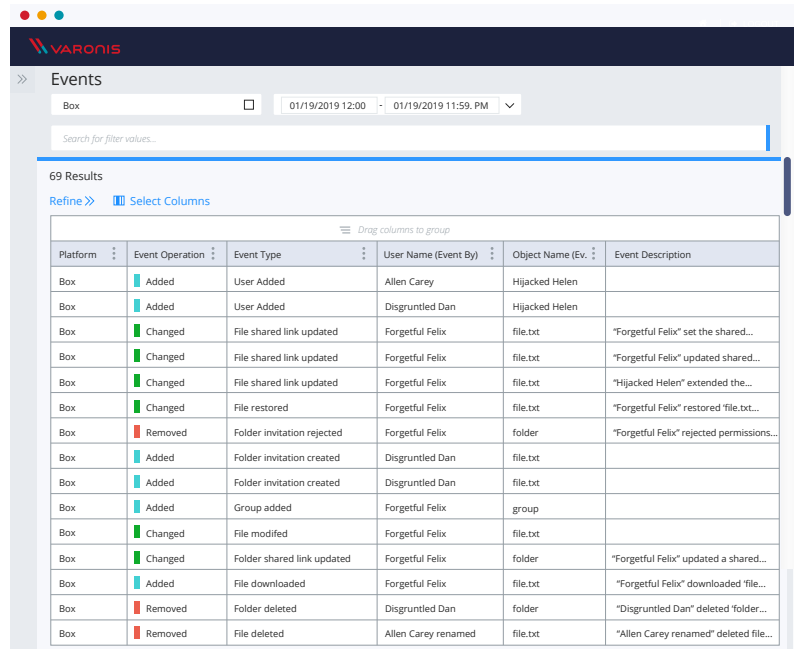

# Enhanced Security Auditing for Box

Varonis gives you a fully searchable audit trail of events on your Box data with details that make investigating security incidents lightning fast.

## Get security insights on Box data

Extend your security coverage with Box Security Events from Varonis so that you can see what's happening on your Box data, reduce risk, and investigate suspicious activity.

Varonis gives you security insights on your data wherever it's stored: so that you can easily monitor user and file activity, user and group management, and even sharing and collaboration activity.

The screenshot shows the Varonis Events interface. At the top, there's a search bar with 'Box' entered and a date range from 01/19/2019 12:00 to 01/19/2019 11:59 PM. Below the search bar, it says '69 Results'. There are links for 'Refine' and 'Select Columns'. A table of events is displayed with columns: Platform, Event Operation, Event Type, User Name (Event By), Object Name (Event), and Event Description. The table contains 15 rows of data, including events like 'User Added', 'File shared link updated', 'Folder invitation rejected', 'Folder invitation created', 'Group added', 'File modified', 'Folder shared link updated', 'File downloaded', 'Folder deleted', and 'File deleted'.

Platform	Event Operation	Event Type	User Name (Event By)	Object Name (Event)	Event Description
Box	Added	User Added	Allen Carey	Hijacked Helen	
Box	Added	User Added	Disgruntled Dan	Hijacked Helen	
Box	Changed	File shared link updated	Forgetful Felix	file.txt	"Forgetful Felix" set the shared...

Box	Removed	Folder deleted	Disgruntled Dan	folder	"Disgruntled Dan" deleted 'folder...
Box	Removed	File deleted	Allen Carey renamed	file.txt	"Allen Carey renamed" deleted file...

## Highlight **risky behavior**

Traditional audit logs can be bulky, difficult to read, and challenging to take action on. Varonis makes it simple: get context on events, filter to find what you need, and easily track activity to get visibility on your data.

Hybrid activity at-a-glance: see security events cross platform in one UI – including user & file activity, user & group management, and sharing & collaboration activity

Security insights: filter, search, and sort by event type including impersonation events, sharing events, and more

Watch list: Add suspicious users to a watch list for additional forensics

Analytics and reporting: leverage predefined searches and out-of-the-box & custom reports (including scheduled reports and dynamic report creation)

## Protect your data in the cloud

Monitor activity and events on enterprise data stored on Box

See what data is shared with everyone, with groups, and more

Easily report on cross-platform activity, security events, and more

Get visibility for security and auditors with a single pane of glass & full audit log of security events

Highlight risky behavior like over-permissive sharing and impersonation and see where to remediate security vulnerabilities

## LIVE PRODUCT TOUR

# Get complete **visibility** and **control** over your data.

See why more than 6,300 of the world's best companies use Varonis to protect their data from insider threats and cyberattacks.

Know where your  
sensitive data lives

Ensure only the right  
people have access

Detect and stop malware  
and insider threats

Sustain a secure environment  
without manual effort

## Get a 1:1 tour of the world's leading data security platform

As the market leader, our data security platform scales like no other. Varonis has been battle-tested for more than a decade on networks with billions of events.
