

ONLINE CLASSROOM TRAINING

Learn how Varonis can help solve your business issues with over 15 specific courses, held throughout the month so that you can fit training into your schedule.

Our training will show you:

- How to find out who has global permissions and can access all the files on your system
- How to produce permission reports based on users, groups, or departmental data
- How to remove Global Access Groups (Everyone, Authenticated Users, etc) without impacting users, and more
- How to clean up your file system and Active Directory (stale data, sensitive data, individual users on the ACL, disabled users with access, users with password never expires, etc) with DatAdvantage

What our customers and partners are saying:

“Great class. I like the shorter courses on a specific use case. There is so much that can be done in this program it’s nice to keep it focused:”

Training was well organized and well delivered:

This training was excellent. I work for a partner, and this training far surpassed the partner training we went through on the product.

Datadvantage Basics

- **DatAdvantage Introduction** – New to DatAdvantage? Learn the basics and get a deep dive into DatAdvantage features (2 hours\credits)
- **Event Discovery** – Get a deeper understanding of the Log area without starting from scratch (2 hours\credits)

Datadvantage Reports

Want deeper understanding and hands-on training for DatAdvantage reports? These classes are designed for you.

- **Reports: File System Permissions** – Permissions reports on folders, Exchange and SharePoint are essential to your operations – learn how to run both on-demand reports and recurring reports to maintain and check permissions. (1 hour\credit)
- **Reports: File System Cleanup** – These reports help clean up your folder structure and permissions so that you can achieve a least privileged model. (1 hour\credit)
- **Reports: Active Directory** – These reports help with AD cleanup: designed for those who do not have a separate license for DatAdvantage for Directory Services. (1 hour\credit)
- **Reports: Statistics, Management and Ownership** – Get hands-on training on statistical, ownership and management reports. These reports help with finding data owners and giving a high-level picture of your environment. (1 hour\credit)
- **Reports: Options, Flags and Notes** – Get an in depth view of how flags and notes can help you use DatAdvantage more efficiently (bonus content: subscriptions and templates)

Datadvantage Advanced Courses

- **DatAdvantage for Storage Engineers and Administrators** – Get the tools you need to find and clean up stale data and stale/inactive users/groups with DatAdvantage. Learn how to find data owners and how to leverage the trend reports. (2 hours\credits)
- **DatAdvantage Administration 1** – Get the tools you need to maintain and configure DatAdvantage on the backend: **Course 1 of 2** (2 hours\credits)
- **DatAdvantage Administration 2** – Get the tools you need to maintain and configure DatAdvantage on the backend: **Course 2 of 2** (1 hour\credits)

Additional Product Courses

- **Directory Services** – Get the tools you need to monitor, audit, cleanup and make account changes to your Active Directory. (2 hours\credits)
- **Data Classification Framework** – Learn how to leverage Varonis' predefined rules to find sensitive data, modify existing rules to meet your needs, and create your own user-defined rules. Find out how to interpret the results and the best practices to follow once you find the data. (2 hours\credits)
- **DatAlert Suite Configuration and Rule Setup** – Learn how to configure DatAlert rules, discover common use cases for DatAlert, and find out how set up notifications via email, syslog forwarding, SNMP trap, or by having a script run when the event occurs. (2 hours\credits)
- **Datalert Forensics, Web UI, and Report** – This course will walk you through how to use the DatAlert Web UI as well as the DatAdvantage GUI to investigate alerts (2 hours\credits)

Upcoming courses:

- **DataPrivilege** – Learn how to install, configure, and use DataPrivilege to its full capability.
- **Automation Engine** – Learn how to use the Automation Suite to automatically fix security vulnerabilities.
- **Remediation** – Discover the steps you can take to clean up your environment to get to a least privilege model, and learn how to apply the Varonis methodology to keep your shares in a secure state.
