

Silver Microsoft Partner

We've all learned that security can't be an afterthought – that's especially true in the cloud where the stakes are higher than they've ever been. Microsoft and Varonis help organizations stay ahead of security challenges in the cloud and on prem.

- See and prioritize risk in on-prem and cloud data stores
- Reduce risk and keep it at bay
- Detect insider threats, outside attackers and malware
- Investigate quickly and conclusively – *is our data safe?*
- Accelerate compliance efforts

“It's more critical than ever to protect enterprise data. The joint Varonis-Microsoft solution gives best-in-class capabilities for enterprise data security – both on-premises and in the cloud.”

— Gagan Gulati, Head of Product for Azure Information Protection at Microsoft.

Where is sensitive data at risk, stale or overexposed?

“When you have to meet compliance regulations, gain visibility into your network, or protect your file shares, Active Directory and Office 365 from potential threats, Varonis is the all-in-one Swiss Army Knife you need.”

— IT Security Administrator, Federal Credit Union
